

# Topic: Biodiversity

## Learning Objective/Outcome:

### Keywords/Questions

### Notes

What is biodiversity?

How many species have scientists identified that are alive today?

Are new species still being discovered today?

Does anyone know how many species exist today?

How many species are estimated to exist today?

Explain how biodiversity can exist within species.

Give an example of biodiversity within species.

Can biodiversity exist between ecosystems?

How does biodiversity benefit humans?

How can biodiversity contribute to ecosystem resilience?

### Summary
