

Explain homeostasis

Three ways the nervous system adjusts to changing stimuli:

Define stimulus

What are two parts of the nervous system?

Nervous System

Define and explain a reflex arc

Neurons

Explain how neurons communicate

Explain the 3 types of neurons

What are the three parts of a neuron?

Nervous System

Describe and explain cerebellum, brain stem, and spinal cord.

Function of the body control center

What is found in the central nervous system?

Explain the cerebrum

Divided into 4 lobes with specific functions: frontal lobe, parietal lobe, temporal lobe, occipital lobe.

Central Nervous System
(CNS)

Name the special receptors in nerves

Peripheral Nervous System
(PNS)

Explain the two parts the PNS is divided into

What is the PNS made up of?
